Introduction

With the SAP Business One mobile app for Android you can process approval requests, view reports and business content, manage business partner data, monitor sales opportunities, and much more.

Key features:

- Activities - get the list of your activities within one month sorted by date. You can update existing activities and add new ones.
- Approvals and alerts - Get alerts on specific events – such as deviations from approved discounts, prices, credit limits, approved or rejected documents, or targeted gross profits – and view approval requests waiting for your immediate action. Drill into the relevant content or metric, including draft documents, before making your decision.
- Business partners – Access business partners’ information including addresses, phone numbers, and contact details; view historical activities and special prices; create new business partners and new activities. In addition, you can synchronize contact persons phone numbers with the phone book on your device.
- Inventory and price lists – Monitor inventory levels, access detailed information about your products, including purchasing and sales price, available quantity, and product specifications, and view price lists.
- Sales documents – Create, view, update, cancel, and search for sales quotations and sales orders, and submit drafts of sales quotations and sales orders for approval. You can also create sales orders based on sales quotations, and view deliveries. In addition, you can create, update, view, and close activities related to sales documents.
- Sales Opportunities - Create, view, edit, and search for sales opportunities; view, add, and edit stages for sales opportunities.
- Service – Process and close service calls, create and view solutions, and look up related service calls from service contracts or customer equipment cards.
- Reports – Refer to built-in reports created with SAP Crystal Reports software, version for the SAP Business One application, that present key information about your business. Add your own customized reports to the app.
- Dashboards – View predefined dashboards (sales analysis, cash flow, and purchase quotations) in normal and full-screen mode.

Attachments - View, download, and upload attachments to business partners, items, activities, sales opportunities, service calls, and sales documents. Requirements for mobile devices:

Android OS 4.0 or higher

Requirements for SAP Business One solution:

- You have installed one of the following:
  - SAP Business One 9.1(PL) 05 or higher
  - SAP Business One 9.1, version for SAP HANA (PL) 05 or higher

  Note

  SAP Business One mobile app 12.x for Android is also available when using SAP Business One Cloud 11 (PL) 02. For further information, see the SAP Business One Cloud Administrator’s Guide.
Integration component for SAP Business One (B1iC)

Note

For further information about installing and upgrading SAP Business One, see the Administrator’s Guide that is provided on the SAP Business One product DVD or in the download package. For security reasons, the SAP Business One mobile app for Android neither stores nor caches business data on the device. It does not support any offline use. A server connection needs to be established to open and use the app. While this document is for all users, some links included in this document lead to sites that are restricted to SAP Business One partners who must have a valid username and password to access.
Installing the SAP Business One App

To download and install SAP Business One mobile app for Android on your Android device, follow this link: https://play.google.com/store/apps/details?id=b1mobile.android
Configuring the SAP Business One Solution

This section explains the tasks of the system administrator in setting up and managing SAP Business One mobile app for Android. These tasks are performed in SAP Business One or in SAP Business One, version for SAP HANA.

Activating Mobile App Users

To enable SAP Business One users to use the mobile app, make the following settings.

1. From the SAP Business One Main Menu, choose Administration → Setup → General → Users.
2. In the Users - Setup window, specify the user for whom you want to make the mobile settings and select the Mobile User checkbox.
3. In the Mobile Phone field, enter the user’s mobile phone number. If you intend to use SAP Business One mobile app for Android on a device which is not a mobile phone, choose a fictitious mobile phone number.
4. In the Mobile Device ID field, enter the device ID of the respective mobile device.
   
   Note
   
   If the Mobile User checkbox is selected, this field is mandatory. To find the device ID, launch the SAP Business One mobile app installed on your device. In the Logon page, tap Settings. The device ID appears in the Device ID field, in the Logon Settings section.
5. To enable a user to use the app by two different mobile devices, enter the device ID of both devices. Use "/" as the separator. For example: AE45FG67816ET98ZV6523BNH8I /1QAZXSW23EDCVFR45TGB678YHN.
   
   Note
   
   It is possible to logon to one mobile device at a time. If a user tries to log on to one device while logged on to the other device, a warning appears and the session automatically ends.
6. Choose the Update button and then choose OK.
   
   Note
   
   If you are working with SAP Business One Cloud 1.0 or higher, choose the Send Mobile Settings button. An e-mail with a hyperlink containing all configuration details will be sent automatically to the mobile device of the given user. For more information see the Configuring Mailer and Registering Integration Components sections in the SAP Business One Cloud Administrator’s Guide, and the Configuring the SAP Business One App when Working with SAP Business One Cloud section in this guide.

Setting Up License

If you have created a new user with mobile settings or added mobile settings to an existing user, a message appears reminding you to ensure that the mobile user has a B1i license.
SAP Business One mobile app for Android is available for the following SAP Business One named user types with no additional license fee:

- Professional
- Limited Financial
- Limited Logistics
- Limited CRM
- Starter Package
- CRM Sales User (standalone, legacy license type)
- CRM Service User (standalone, legacy license type)

For more information about the mobile app functions available for each license type see the Mobile App Function Availability Based on SAP Business One License Type section in this document.

To assign a user a Bi1 license, follow the steps below.

1. From the SAP Business One Main Menu, choose Administration → License → License Administration. The License Administration window appears.
2. In the Allocation tab, first select the relevant users and then select the Used checkbox for the Bi1 user type license.
3. Choose the Update button.

Configuring for SAP Crystal Reports

To make a report created with SAP Crystal Reports visible within the mobile app, follow the steps below.

1. From the SAP Business One Main Menu, choose Administration → Setup → General → Report and Layout Manager.
2. In the navigation pane on the left, select the report you want to display on the mobile device.
3. Select the Visible for Mobile checkbox. This checkbox is visible only for reports in the SAP Crystal Reports format, not for reports in other formats.

⚠️ Caution
SAP Business One does not check whether the report is suitable for displaying on a mobile device.

4. To save your settings, choose Update.

❗️ Note
The resolution of the mobile device determines how the report is displayed.
Configuring for SAP Crystal Reports Deployed on SAP Business One analytics powered by SAP HANA

This procedure is relevant only if you are using SAP Business One analytics powered by SAP HANA and would like to enable viewing in the mobile app SAP Crystal reports which are deployed on SAP Business One analytics powered by SAP HANA.

1. Open the report in the SAP Crystal Reports for SAP Business One designer. In the Data area → Available Data Sources, choose either the HDBODBC connection for 64 bit, or HDBODBC32 for 32 bit.
2. Select the Enter Connection String radio button, and in the Connection String field enter the name of the target company data base as schema in command, or import the table from the target company database.

Example

Connection String: DRIVER={HDBODBC32};UID=SYSTEM;PWD=Password;SERVERNODE=192.168.1.4:30015;DATABASE=SBODEMO;
Command: SELECT "ItemCode", "ItemName" FROM "SBODEMO"."OITM"

3. Repeat the above steps for each target company database.

Configuring for SAP Crystal Reports Based on SAP HANA

This procedure is relevant only if you are using SAP Business One 9.0, version for SAP HANA PL02, and would like to enable viewing in the mobile app SAP Crystal reports based on SAP HANA.

1. Open the report in the SAP Crystal Reports for SAP Business One designer. In the Data area → Available Data Sources, choose either the B1CRHPROXY connection for 64 bit, or B1CRHPROXY32 for 32 bit.

   Note

   If HDBODBC or HDBODBC32 is used as connection, replace it by B1CRHPROXY or B1CRHPROXY32 respectively.

2. Select the Enter Connection String radio button, and in the Connection String field remove "Schema@" and "Package@" from all the parameters of commands and tables if exist.

Example

Connection String: DRIVER {B1CRHProxy32};UID=SYSTEM;PWD=Password;SERVERNODE=192.168.1.4:30015;DATABASE=SBODEMO;
Command: SELECT "ItemCode", "ItemName" FROM "OITM"

3. Repeat the above steps for each target company database.
Setting Up Add-Ons to Run Within the Mobile App

For SAP Business One add-ons that run on mobile devices and are delivered by partners, make the settings described below.

1. From the SAP Business One Main Menu, choose Administration → Add-Ons → Mobile Add-On.
2. In the Mobile Add-On - Setup window, enter the relevant data in the Code, Name, Entry URL, and Provider fields.
3. In the Type field, choose Module for Android devices. Home is not applicable for Android.
4. In the View Style field, specify the relevant view:
   - Page-Universal - for add-on that works on Android devices
   - Full Screen - iPad - not applicable for Android
   - Landscape Only - iPad - not applicable for Android
5. In the Logon Method field, specify whether the add-on requires authentication for logon:
   - B1i Framework - Select this option if add-on back-end scenarios are implemented on B1i Framework and the same session ID will be shared with this add-on.
   - Standard Logon - Select this option for add-on that requires user logon authentication. In this case a logon message box appears asking for user name and password.
   - No Control - select this option for add-on that does not require any authentication to be provided by SAP Business One, or for add-on that controls independently everything that has to do with authentication.
6. To save your settings, choose Update.

More Information

See the guide How to Create Add-Ons for the SAP Business One Mobile App for iOS and Android located at https://partneredge.sap.com/en/products/business-one/about/sbo-mobile.html, where you can also find sample code.

Configuring the SAP HANA Server

Note

This section is relevant only when working with SAP Business One, version for SAP HANA.

1. In the Integration Solution for SAP Business One page, choose: SLD → B1I Server → B1A Server. The B1A Server area appears. Choose the Edit button.
2. In the HTTA section (under Connectivity List (Active)), enter in the following fields (all of them are mandatory) the respective details as appear in the B1A Server:
   - destProtocol
   - destHost
   - destPort

Example

The URL for accessing the B1A Administration Console is: https://10.58.114.44:8443/Enablement the above mentioned fields are filled in as follows:
Configuring for SAP Business One analytics powered by SAP HANA

Note
This section is relevant only when working with SAP Business One analytics powered by SAP HANA.
Follow the steps below to enable viewing in the mobile app SAP Crystal Reports deployed on SAP Business One analytics powered by SAP HANA.

1. In the Integration Solution for SAP Business One page, choose: SLD → B1i Server → B1A DB. Choose the Edit button.
2. In the Connectivity List (Active), update the JDBC information as follows:
   o Driver: com.sap.db.jdbc.Driver
   o URL: jdbc:sap://<B1A SERVER>:30015?currentschema=<SCHEMA>;databaseName=<DBNAME>;
   o Username: <Your HANA DB user code>
   o Password: <Your HANA DB password>
3. Choose Save

Activating the B1i Mobile Scenario

After completing setup and configuration tasks in SAP Business One and on your Android device, you must activate the B1i scenario. This enables the SAP Business One mobile app to communicate with the SAP Business One database and vice versa.

1. On the B1i server, choose Start → All Programs → Integration Solution for SAP Business One → Integration Framework.
   The Connect to <server name> window appears.
2. In the User name: field, enter B1iadmin; in the Password: field, enter the password that was set by the user when installing B1i. Choose the OK button.
   The Integration solution for SAP Business One window appears.
3. Choose the Scenarios tab → Control. In the Scenario List, select the sap.B1iMobile checkbox.
4. In the Integration framework – Scenario Setup Result screen, choose the Activate button.
   After a few seconds, a system message appears, announcing that preparations are finished and asking whether you want to activate the scenario.
5. To activate the scenario, choose the OK button.
   After few seconds, a confirmation message appears.
6. To complete the activation process, choose the OK button.
Configuring the SAP Business One App

To connect to your SAP Business One company database, follow the steps below.

1. Tap the Business One icon on your Android device. The Logon page appears.
2. Tap Settings.
3. On the WEB SERVICE section, specify the following information:
   - **Server**: Server address (either IP or server name).
   - **Port**: Default ports of integration solutions for SAP Business One are 8080 (http) and 8443 (https). If you enter an incorrect port for a server connection, the app times out in 75 seconds by default.
   - **SSL**: Select this checkbox to use SSL (https) between SAP Business One and your Android device. This setting must comply with the protocol and assigned ports on the server side.

   **Recommendation**
   Use a secure communication channel. Keep the SSL checkbox selected (which is the default value).

   **Note**
   For more information about configuring https, see the Security Aspects Related to the Mobile Solution section in Administrator’s Guide for the Integration Component.
   Be aware that SAP cannot cover all possible security aspects due to customer-specific requirements and conditions. The mobile app needs to be embedded into each customer’s specific security concept.

4. On the LOGON SETTINGS section, specify the following information:
   - **Company DB**: Name of the company database to which you want to connect (mandatory field). The mobile app logs on to this company.
   - **User Code**: Used to log on to the SAP Business One company database specified in the Company DB field; that is, the value in the User Code field of the Users - Setup window in SAP Business One. If you specify a user code in this field, when you log on to the app you need to enter only your password.
   - **Phone Num**: User’s mobile phone number; that is, the value in the Mobile Phone field of the Users - Setup window in SAP Business One.
   - **Demo System**: When the demo system is ON, the logon dialog offers the user access to the public demo system. Currently, the supported demo server is Germany - powered by SAP HANA (in Settings → Demo Server field).

   **Note**
   The app uses the language that you use on your Android device. All SAP Business One languages are supported.
Configuring the SAP Business One App when Working with SAP Business One Cloud

1. In your Android device, open the e-mail you have received from SAP Business One administrator. Click the hyperlink that appears in the e-mail.

2. SAP Business One app is automatically launched and saves the relevant information in the Settings page in the app.

3. In the Logon page enter your password, and tap OK. The mobile app automatically connects to the company database recorded in the Settings page.
Using the SAP Business One App

Deploying Valid Certificate on B1i Server and Android

Starting from release SAP Business One mobile app 1.1.x for Android, the app checks the certificate validity when using SSL connection. Valid certificate is mandatorily required for servers to be accessed by mobile apps. Refer to SAP Note 2019275 - How to enable SSL connection to servers from mobile apps by deploying valid certificates for more details.

Choosing a Company Database

By default, the mobile app logs on to the company database specified in the Settings page. To log on to a different company database, follow the steps below:

1. Tap the Business One icon on your mobile device. The Logon page appears displaying by default the company database defined in the Settings page, or the company database you logged on to in the last time.
2. Tap the company database drop down menu and select the relevant company database.
3. Enter your password and tap OK.

Starting Page

Once you are logged on, the starting page appears displaying list of all available modules. The mobile app retrieves authorization settings as defined in SAP Business One desktop application, controlling accessing, viewing, adding, and editing data. For detailed information regarding the authorizations required for the different functions of the mobile app, see Your Feedback Matters

You can provide SAP feedback about the quality, usability, functionality, or any other matter. Your input may help SAP to improve the mobile app.

1. Tap the menu button ➔ Feedback and enter your feedback in the form
2. Tap Send.

Function-Level Authorizations for Users to Work with the App in the appendix.

Note

If the app is idle for a period of time, a logon box appears, and you have to log on to the app again. By default the idle time is ten minutes. To change this value:

1. Open the integration framework Web page and choose Scenarios ➔ Authentication.
2. From the User Def. Author. Identifier dropdown list, choose sap.B1Mobile.
3. In the Session Timeout field, specify a value. If you enter an incorrect port for a server connection, the app times out in 75 seconds by default.
4. Choose the Save button.
Managing Modules

All the SAP-provided modules are listed in the main page of the mobile app. If needed, you can hide selected modules. To do so follow the steps below:

1. In the main page of the app tap . The Preferences page listing all the modules appears.
2. Deselect the modules you want to hide, and tap .

Setting Preferences per Module

You can sort and set the display of different types of information in the various modules by using the Preferences option. To do so follow the steps below:

1. In the main page of the app tap . The Preferences page listing all the modules appears.
2. Tap in the relevant module. A page listing the available preferences in the selected module appears.
3. Make the required display settings and tap .

Searching in the Mobile App

You can search for specific document, business partner, item, and other data that exist in your SAP Business One company database within the mobile app. The search option is available if the search icon appears. For example, when you tap the Service Call module, the list of service calls is displayed. The search icon appears at the top of the page.

You can search for documents and records by using the fields listed below for the different modules:

- Business Partners: Business Partner Code, Business Partner Name
- Inventory module: Item No., Item Description
- Sales Opportunities: Opportunity Name, Opportunity No., Business Partner Code, Business Partner Name
- Sales Quotation, Sales Order, and Delivery: Business Partner Code, Business Partner Name, Item No., Item Description, Doc No.
- Service Contract: Customer Code, Customer Name, Item No., Item Description
- Service Call: Subject, Customer Code, Customer Name, Item No., Item Description, Serial Number, Contract No.

To perform a search, follow the steps below.

1. Tap the search icon.
   The keyboard appears.
2. Enter a value for the search term. For example, if you are searching for a sales order, you can enter the code or name of the business partner, for whom the sales order was created, or the code or description of the item for which the sales order was created.
3. Tap the search key in the keyboard.
   The list of matching results appears.
Note
To fine-tune the results, repeat the steps above, using a more accurate search term.

Note
When initiating a search on a filtered list, the search applies to the filtered list only and not to all of the records that exist in the specific module.

Using the Enterprise Search

Note
This option is only available for SAP Business One, version for SAP HANA, and SAP Business One, Analytics powered by SAP HANA 11PL02 (used with SAP Business One 8.82 PL13 or SAP Business One 9.0 PL06 or higher) and only on tablets.

1. Tap the search box.
   The keyboard appears.
2. Enter a value for the search term and tap the Search key in the keyboard.
3. The Enterprise Search page appears, displaying the matching results.
4. Tap on each of the following result types to view the respective module:
   o Business Partner
   o Inventory
   o Sales Opportunity
   o Sales Quotation
   o Delivery
   o Service Solution
   o Service Call
   The Enterprise Search page remains open in the background. To return to the Enterprise Search page, tap the Yellow ribbon at the top of the screen.
5. To close the Enterprise Search page, tap Close.

Managing Your Activities in the Activities Module

In the Activities module, you can:
- View your activities in a monthly view. By default the activities in the current month are displayed, sorted by date. Tap ‹‹ or ‹› to view the activities in the next or previous month
- Synchronize the activities with the calendar in your mobile device.
- Add, edit, and close your activities which are linked to business partners, opportunities, quotations, orders, or service calls.
- Create follow up activities
Processing Existing Activities

1. In the Modules tab, tap Activities. A list of existing activities for the current month appears.
2. Navigate to the activity you want to process and tap to display it.
3. The Activity Details page appears. Tap to make the required changes, and then tap.
4. To create a follow up activity, tap and then tap Follow-Up Activity. A new activity is created, containing all the information from the original activity. Make the relevant updates and tap.
5. To close an existing activity, tap and then tap Close Activity. The status of the activity is set to Closed.

Adding New Activities

1. In the Modules tab, tap Activities. A list of the existing activities for the current month appears.
2. Tap. The Add Activity page appears. Assign the required business partner.
3. Enter any additional details.

   Note
   - The available options under Subject field depend on the selection made in the Type field.
   - In the Link To field you can assign a sales document to the activity. This option is not available when creating an activity for a vendor.
4. Tap.

Synchronizing Activities with Device Calendar

To synchronize the activities in the SAP Business One mobile app with the calendar on your mobile device follow the steps below:

1. In the Modules tab, tap Activities. A list of the existing activities for the current month appears.
2. Tap and then tap Sync to Calendar. The time duration can be selected in the preferences page of the Activities module.

Working with Documents in the Approvals Module

The Approvals module lists all the documents pending to your approval. The number of unread documents appears on the module entry in the Modules tab.

In the Approvals module, you can:
- View documents in the approval process sorted by date or by type
- Approve or reject documents in the approval process including travel and leave requests
Approving or Rejecting Documents

1. In the Modules tab, tap Approvals.
   A list of documents appears. The unread documents displayed as bold with an icon of a closed envelope.
   The list can contain a maximum of 50 documents. The documents are displayed by date, in a descending order, the latest document is the first and the oldest is the last. To display the documents by type, tap and select By Type.
2. Tap the document that you want to approve or reject.
   The Approval Info page appears, displaying the main details of the document draft including line details. Tap the required line to view its details. To view the complete document draft sent for approval, tap the Doc. Type field. The Draft Detail page appears, displaying the document draft including user defined fields.

   Note
   When viewing an approved document, it is not possible to drill down to the document details by tapping Doc. Type, and the user defined fields (if exist) are displayed in the Approval Info page.
   Tap Back.
3. Tap Approve or Reject.
   The Approve window or Reject window appears accordingly.
4. Enter your remarks (optional).
5. Tap OK.

   Note
   To stop the process, tap Cancel.

   The message Approved successfully or Rejected Successfully appears, in addition a respective alert is sent to the user submitted the draft document for approval:
   o Request approved - the user can tap the alert, view the details of the draft document that was originally submitted for approval, and add it.
   o Request rejected - the user can tap the alert, view the remarks entered by the approver (if available) and the details of the draft document that was originally sent for approval.

Viewing Alerts in the Alerts Module

In the Alerts module, you can view real-time alerts from SAP Business One, sorted by date, type, or priority. The number of unread alerts appears on the module entry in the Modules tab.

1. In the Modules tab, tap Alerts.
2. A list of alerts appears. The unread alerts appear in bold. A maximum of the most recent 50 alerts is displayed. The alerts are displayed by date, sorted in a descending order, from the latest to the oldest. To change the sort order, tap and choose whether to sort the alerts by type, or by priority. Tap OK.
3. Tap the alert that you want to view.
   The Alert Info page appears. You can tap fields for more information, for example, information of the item in stock. In case the alert refers to a document that was sent for approval, you can tap the alert and view details of the draft document. If the document is approved, you can add it by tapping Add in the Draft Detail page.
Submitting Leave or Travel Requests for Approval

You can submit leave request and travel request for management approval. To use this functionality, you have to define first a respective workflow template in the back end. For more information see the guide: How to Configure the Workflow Service and Design the Workflow Process Templates in http://service.sap.com/smb/sbocustomer/documentation

1. Tap the Self Service module. The Employee Self Service page appears.
2. Tap Add Leave Request or Add Travel Request (as required). The respective page appears.
3. Enter all relevant information, and tap Send. The leave or travel requests are sent to the approving manager(s) and appear in the Approvals module.

Managing Business Partner Data in the Business Partners Module

In the Business Partners module, you can filter, view, update, add, and search for business partner information.

Filtering Business Partners

You can filter the list of business partners in the Business Partners module according to business partner types. Tap the Filter icon. In the Filter window select which business partners you want to view:

- **Lead** - to display list of business partners of type Lead.
- **Customer or Vendor** - to display only business partners of type Customer or Vendor
- **My** - to display all the business partners in which the defined sales employee or buyer is the current user
- **All** - selected by default. Displays all the existing business partners, of all types: Lead, Customer, and Vendor.

The filter you apply is kept by default for the next time you enter to the Business Partners module.

For example, if you applied the filter Customer, the next time you access the Business Partners module, the list of business partners will consist of business partners of type Customer only.

Note

When initiating a search after applying a filter, the search applies to the filtered list. For example, if you applied the Customer filter and then initiated a search, the search applies to business partners of type Customer only.
Viewing Business Partner Information

1. On the Modules tab, tap Business Partners.
   A list of business partners sorted alphabetically by business partner name appears. By default, the first 20 business partners appear. To view the next 20 business partners, scroll down the list to the bottom. To refresh the list, pull down the list at the top of the list.

   Note
   The list has an index along the left side. To jump to business partner whose name starts with a specific letter, tap that letter. To scroll quickly through the list, drag your finger along the index.

2. To view information about a business partner, tap the business partner.
   The BP Info page appears. It includes the following tabs:
   - **GENERAL** – Displays the account balance, credit limit, payment terms and price list assigned to the business partner, as well as contact details for the company, such as phone number, e-mail address, and Web site.
   - **ADDR/CONTACTS** – Displays the default contact person and the default ship-to and bill-to addresses.
   - **TRANSACTIONS** – Tap the relevant category to view the documents or transactions created for the business partner:
     - **Activities** – Displays the list of activities created for the business partner
       To view an activity, tap it.
       The Activity Detail page appears. To edit the activity, tap and make changes. To save your changes, on the right of the toolbar, tap .
       To add an activity, tap .
       The Add Activity page appears. Specify the information and tap .
     - **Special Price** – Displays the special prices of items for the business partner. To view item information, tap the item. From the item display, tap Unit Price to view the item’s price in various price lists.
     - **Opportunities, Sales Quotations, Sales Orders, and Deliveries** – Display, respectively, the sales opportunities, sales quotations, sales orders, and deliveries created for a business partner. To create a new opportunity, sales quotation, or sales order, tap . To return to the list of business partners, on the left of the toolbar, tap Back.
   - **PERVASIVE** – Displays the pervasive analysis information for this business partner.

   Note
   Users of SAP Business One, version for SAP HANA who has Android tablets can view in the Pervasive tab the pervasive analysis information for the business partner. For more information, see Pervasive Analysis section in the SAP Business One, version of SAP HANA User Guide.

Editing Business Partner Information

1. Display the business partner whose information you want to edit (see Viewing Business Partner Information).
2. Tap .
The Edit BP page appears.

3. Tap any detail you want to edit, make the required change, and then tap OK.

For example, to change the business partner name, tap BP Name. Enter the new name in the text box and then tap OK. In addition, you can apply the following changes:

- Change the type of the business partner from Customer to Vendor and vice versa. In this case the Sales Employee or Buyer fields replace one another respectively (changing the type of business partner is possible only if there are no journal entries created for the given business partner).
- Replace the default contact person with an existing one, and create a new contact person.
- Edit the exiting Ship to and Bill to addresses, change the default Ship to or Bill to addresses, and create new addresses.
- Assign default price list

4. After making your changes, tap .

Adding Business Partners

1. On the Modules tab, tap Business Partners.

   The Business Partners page appears.

2. Tap .

   The Add BP page appears.

3. Specify the information and tap .

Synchronizing BP Contact Persons with the Phone Book

You can integrate the BP’s contact persons details to the phone book on your mobile device. This way you gain access to contact persons information without having to log on to SAP Business One mobile app.

1. To add contact person info to the mobile device phone book, tap the relevant contact person. The Contact Info page appears

2. Choose the Sync button. The contact person info is displayed as a phone book record. To create a new contact person in the device phone book, tap Create New Contact.

3. To add the contact person info to an existing contact person in the phone book, tap Add to Existing Contact.

   The list of contacts that already exist in the phone book appears. Tap the required existing contact. The details of the existing contact will be updated according to the contact person details from SAP Business One mobile app.

Creating New Contact Person Based on Contact in the Phone Book

You can create a new contact person for business partner based on existing contact in your device’s phone book.

1. Open the business partner for whom you want to add the new contact person. Tap the ADDR/CONTACTS tab → tap All Contacts. The list of all contacts defined for this business partner appears
2. Tap New Contact, and then tap From Address Book. The list of contacts defined in the mobile device's phone book appears.
3. Choose the contact you want to add as a contact person for the given business partner.
4. Tap Done.

Viewing Items in the Inventory Module

In the Inventory module, you can:

- View information about items in inventory, including the unit price of a selected item
- View quantities of an item by warehouse
- Search for items in inventory (follow the steps in Searching in the Mobile App)

Viewing Information about Items in Inventory

1. On the Modules tab, tap Inventory.

The list of items is displayed sorted alphabetically by item code. By default, the first 20 items appear. To view the next 20 items, scroll down the list to the bottom. To refresh the list, pull down the list at the top of the list.

Note

The item list has an index along the left side. To jump to items whose item code starts with a specific letter, tap that letter. To scroll quickly through the list, drag your finger along the index.

Note

Users of SAP Business One, version for SAP HANA who has Android tablets can view in the Pervasive tab the pervasive analysis information for the item. For more information, see Pervasive Analysis section in the SAP Business One, version of SAP HANA User Guide.

2. To view information about an item, tap the item.

The Item Info page displays detailed information about the item, including user-defined fields.

- To view the price of the item in various price lists, tap Unit Price.
- To view inventory levels of the item by warehouse, tap In Stock Qty. For each warehouse, you see the quantity of the item in stock, committed, ordered, and available.

Viewing Price Lists in the Price Lists Module

In the Price Lists module, you can view the price lists as defined in your SAP Business One company database and search for specific items within a given price list.
Viewing Price List Details in the Price Lists Module

   The Price Lists page appears, listing all the price lists that exist in your SAP Business One company database.
2. To view the prices defined in a specific price list, tap the relevant price list.
   The &lt;price list name&gt; page appears. The selected shows a list of items sorted alphabetically by item code with their prices. By default, the first 20 items appear. To view the next 20 items, scroll down the list to the bottom.
   To refresh the list, pull down the list at the top of the list.
   Note
   The list has an index along the left side. To jump to an item whose code starts with a specific letter, tap that letter. To scroll quickly through the list, drag your finger along the index.
3. To return to the Price Lists page, tap Back.

Searching for Items in Within a Price List

To search for a specific item within a given price list, follow the steps described in Searching in the Mobile App.

Managing Sales Documents in SAP Business One Mobile App

You can view, search for, create, and cancel sales quotations, and sales orders, as well as submitting drafts of sales quotations and sales orders for approval, by using the relevant module:

- Sales Quotation module
- Sales Order module

In addition, you can update exiting sales quotations and sales orders, manage activities related to these documents, create sales orders based on sales quotations, and view deliveries.

Viewing Sales Document Information

1. On the Modules tab, tap the relevant module.
   A page listing the existing sales documents of the selected module appears. The sales documents are sorted in descending order by document number. By default, the 20 most recent documents are displayed. To view the next 20 documents, scroll down the list to the bottom. To refresh the list, pull down the list at the top of the list.
   Note
   Sales documents with a status of Open have a blue side bar in the front of the sales document.
2. To view information about a sales document in the list, tap the sales document.
For sales opportunities, the Opportunity Info page displays opportunity details such as business partner, status, stage, and so on.

The Info page for sales order and sales quotation contains four tabs: Header, Contents, Logistics, and Accounting. The page contains the following information:

- **Header** tab - Document number, currency, sales employee, customer reference number, status, business partner details, dates, total values, and user-defined fields, if any exist.

- **Contents tab**
  - For an item type document:
    - Each row has a summary row on this tab, including item description, item code, quantity, unit of measure, items per unit, and user-defined fields if exist. To view row details, tap the row. The Details page appears.
    - To view detailed information of the item, tap Item. The Stock Info page appears.
  - For a service type document:
    - Each row in the sales order has a summary row on this tab, including description, line total, and user-defined fields if exist. Line total is displayed in document currency. To view row details, tap the row. The Details page appears.

- **Logistics** tab - Bill-to and ship-to addresses and shipping type, if defined. To see a map and get directions, tap the relevant address.

- **Accounting** tab - Payment terms and payment means defined for the document, as well as the BP project.

### Updating Sales Documents

You can update existing sales quotations and sales orders that comply with the following conditions:

- The sales quotation or sales order is in status Open
- The sales quotation or sales order was not fully or partially drawn into target document
- The sales quotations or sales order is not subject to approval procedure

#### Procedure

1. Display the sales quotation or sales order you need to update
2. Tap Edit. The document is switched to **Edit** mode.
3. Make all the changes required.

   **Note**
   
   When editing the Items page, you can check the available quantity of the different items, tap in the top right-hand corner to show the popup menu and tap the Inventory by Warehouse. The Inventory by Warehouse page appears, displaying the total available, in-stock, ordered, and committed quantities in all warehouses, as well as in each warehouse separately. To return to the Items page, tap **Back**

4. To save your changes, tap ✓.

   **Note**
   
   The following values cannot be modified:
Cancelling Sales Documents

You can cancel existing sales quotations and sales orders that comply with the following conditions:

- The sales quotation or sales order is in status Open
- The sales quotation or sales order was not fully or partially drawn into target document
- The sales quotations or sales order is not subject to approval procedure

Procedure

1. Display the sales quotation or sales order you want to cancel
2. Tap and then tap Cancel Quotation or Cancel Order (depends on the selected document)
3. A warning saying that the action is irreversible appears. To complete the cancellation, tap OK. The status of the document is set to Canceled.

Searching for Sales Documents

To search for specific sales document, follow the steps described in Searching in the Mobile App

Filtering Sales Quotations, Sales Orders, and Deliveries

You can filter sales quotations, sales orders, and deliveries to view only documents with status Open, documents created by you, or to view all the existing documents.

To filter the view of existing documents, choose the Sales Quotations, Sales Orders, or Delivery module. Tap .

The Filter window appears:

- To view only documents created and owned by you, select My, and tap OK.

  Note
  
  This option is available only if the current user, who is logged on to the app, has an employee master data record that is linked to the current user code.

- To view only documents with status Open, select Open and tap OK.
- To clear the filter and display all documents, select All and tap OK.

  Note
  
  When initiating a search after applying a filter, the search applies to the filtered list, and not to all existing documents.
Creating Sales Quotations and Sales Orders

You can create sales quotations and sales orders only for items, not for services.

1. On the Modules tab, tap the module of the sales document you want to create. The list of existing sales quotations or sales orders appears.
2. Tap ✅. The Add <Sales Document Name> page appears.
3. The field Doc. Series displays the default numbering series defined for the sales quotation or sales order. To assign to the document different numbering series, tap this field. A list of all available numbering series appears. Tap the numbering series you want to assign to this document.
4. To specify the business partner for whom the document is created, tap Business Partner. The list of business partners appears.
5. Select the relevant business partner and tap OK.
   - The main contact person and the default sales employee of the selected business partner are automatically populated in the respective fields. To assign a different contact person or sales employee to the document, tap the relevant field. A list of the available contact persons or sales employees appears. Tap the required contact person or sales employee and then tap OK.
   - The BP currency is automatically populated in the Currency field. In case there is more than one currency defined for the BP, the first one is populated by default. To assign to the document a different currency, tap the Currency field. The list of available currencies appears. Tap the required currency and then tap OK.
6. To add items to the document, tap Item. The Inventory page appears listing the existing items.
7. Tap the required items (you can select multiple items from the list), and specify the required quantity for each. Tap ✅. To check the available quantity of the item in the warehouse, tap ☐ in the top right-hand corner to show the popup menu and tap the Inventory by Warehouse. The Inventory by Warehouse page appears, displaying the total available, in-stock, ordered, and committed quantities in all warehouses, as well as in each warehouse separately. To return to the Items page, tap Back.

   Note
   - To remove an item, long tap on that item will show Delete menu on top right hand corner

   Note
   - In sales quotations only, you can mark selected items as alternative. The price of alternative items is not included in the document total. To mark an item as alternative, tap the relevant item and turn the Alternative switch (under the Item Name field) on.
8. Specify any other relevant information.
9. To add the document, tap ✅.
Creating Sales Orders based on Sales Quotations

To create a sales order based on existing sales quotation follow the steps below:

1. Display the sales quotation you want to draw to sales order
2. Tap and then tap Copy to Order
3. The Order Info page appears with all the details copied from the sales quotation. Make any changes if required, and tap ✓.

Submitting Drafts of Sales Quotations and Sales Orders for Approval

You can create drafts of sales quotations and sales orders and trigger an approval procedure, if defined.

Note

This functionality is available only if the checkbox Activate Approval Procedures in DI is selected in AdministrationÆSystem InitializationÆGeneral SettingsÆBP tab.

1. Create the sales quotation or sale order by following steps 1-8 provided in the Creating Sales Quotations and Sales Orders section above.
2. To add the document, tap ✓. A system message appears, notifying you that an approval is required.
3. Enter any relevant remarks and tap OK. To return to the document, tap Cancel.
4. A draft of the sales quotation or sales order is created and sent for approval.

Managing Activities for Sales Documents

You can view, add, edit, and close activities related to sales quotations and sales orders. For more information see the Managing Your Activities in the Activities Module section.

Managing Sales Opportunities

In the Sales Opportunities module you can:

- View, edit, create, and search for sales opportunities
- View, edit, and create stages for sales opportunities
- Assign sales employees to sales opportunities and sales stages and create new ones if required
Viewing Sales Opportunities

1. On the Modules tab, tap the Sales Opportunities.
   A page listing the existing sales opportunities, filtered by status appears. The sales opportunities are sorted in descending order by document number. By default, the 20 most recent sales opportunities of the selected status are displayed. To view the next 20 sales opportunities, scroll down the list to the bottom. To refresh the list, pull down the list at the top of the list.

   Note
   By default, sale opportunities with status Open are displayed. To display sales opportunities of status Won or Lost, tap Filter. The Filter window appears. To display all the sales opportunities, select All and tap OK. To display sales opportunities of status Won or Lost, select the respective option and tap OK.
   When initiating search, the search applies to the filtered list only, and not to all of the existing sales opportunities.
   Sales opportunities with a status of Open have a blue side bar in the front of the sales document.

2. Tap a sales opportunity to view its details.
   The Opportunity Info page displays opportunity details such as business partner, status, stage, and so on.

Editing Sales Opportunities

1. On the Modules tab, tap Sales Opportunities. The list of existing sales opportunities appears.
2. Tap the sales opportunity you want to edit. The Opportunity Info page appears, displaying the details of the selected sales opportunity.
3. Tap Edit and then tap Edit and make the required changes.
4. To edit the last stage of the selected sales opportunity, tap the Stage field, make the required changes, and then tap.
5. Tap

Creating Sales Opportunities

1. On the Modules tab, tap Sales Opportunities.
   The list of existing sales opportunities appears.
2. Tap .
   The Add Opportunities page appears.
3. Specify the required information and tap .
Searching for Sales Opportunities

To search for specific sales opportunity, follow the steps described in Searching in the Mobile App

Viewing Stages Related to Sales Opportunities

To view stages related to a selected sales opportunity perform the following steps:

1. Display the required sales opportunity.
2. Tap All Stages. The list of all stages and the respected closing rate related to this sales opportunity appears.
3. Tap a stage to view its details. The Stage Info page appears, displaying all the details of the selected stage:
   - Closing Rate
   - Potential Amount
   - Stage - displays the stage name
   - Stage Start Date and Stage Close Date
   - Sales Employee
   - Remarks
   - Document - if the stage is related to a specific sales document (sales quotation or sales order), this field displays the document type and its number. To view the related document, tap the field.
   - Activities - tap to view the list of activities related to this stage. You can also add or update the activities in latest stage

Adding New Stages to Sales Opportunities

You can create new stages to existing sales opportunities with status Open.

To create new stages for sales opportunities perform the following steps:

1. Display the sales opportunity for which you want to create the new stage, and tap.
2. Tap Add a Stage. In the Add a Stage page enter all relevant details for the new stage. Potential Amount is a mandatory field.
3. To relate the new stage to a specific document type, tap Doc. Type, and select either sales quotation or sales order. Then, choose the specific sales quotation or sales order. The selected document and its number are displayed in the Document field, in the Stage Info page.
4. Tap.

Setting Won or Lost Statuses to Sales Opportunities

To set the status Won or Lost to an existing sales opportunity with status Open, perform the steps below:
1. Display the sales opportunity for which you want to change the status. Tap \( \text{Set Status} \).
2. Tap \( \text{Set Status} \). Tap the status you want to set to the sales opportunity.

\[ \text{Note} \]

When changing the status of a sales opportunity from \( \text{Open} \) to either \( \text{Won} \) or \( \text{Lost} \), it is not possible to make any additional changes to the document.

Viewing Dashboards in the Dashboards Module

Using the \( \text{Dashboards} \) module, you can view the following predefined dashboards:

- **Sales Analysis Dashboard** – contains the following charts:
  - \( \text{Fiscal Year Analysis} \) – compares this year’s sales amount to last year by month.
  - \( \text{Opportunity Win Rate} \) – compares this year’s opportunity win rate to last year by month.
    - For a displayed month, the win rate equals the number of opportunities won in the month divided by the total number of opportunities closed in the month.
    - Closed opportunities include opportunities with a status of \( \text{Won} \) or \( \text{Lost} \).

\[ \text{Note} \]

\( \text{Fiscal Year Analysis} \) and \( \text{Opportunity Win Rate} \) display general sales performance.

- \( \text{Top 5 Customers} \) – displays the top five customers selected by current fiscal year revenue.
  
  To view details about a customer, tap \( \text{Sales Amt} \) or \( \text{Gross Profit} \) associated with the customer. The \( \text{Item Ranking} \) and \( \text{Opportunities Status} \) charts are updated for the selected customer.

- \( \text{Item Ranking} \) – displays the top five items for the selected customer in the current fiscal year.

- \( \text{Opportunities Status} \) – displays opportunities by status for the selected customer.

\[ \text{Note} \]

\( \text{Top 5 Customers}, \text{Item Ranking}, \) and \( \text{Opportunities Status} \) display details about the top five customers.

- **Cash Flow Dashboard** – contains the following charts:
  - \( \text{Cash Flow Forecast Overview} \) – displays incoming cash flow and outgoing cash flow by month.
    
    To view details of incoming cash flow or outgoing cash flow for a month, tap the corresponding period. The \( \text{Cash Flow Details} \) and \( \text{BP Amount} \) charts are updated accordingly.

- \( \text{Cash Flow Details} \) – displays the five transactions with the largest amounts for the selected period sorted in descending order by amount.

- \( \text{BP Amount} \) – displays cash flow amounts by business partner for the selected period.

- **Purchase Quotations Dashboard** – Contains the following charts:
  - \( \text{Purchase Quotation Overview} \) – displays the overview of purchase quotations in three categories (\( \text{Responded, Partial/ No Response, Overdue} \)).
    
    To view the purchase quotation details, tap each section of the pie chart.

- \( \text{Purchase Quotation Detail} \) – displays detailed information on purchase quotations according to the selected category.
  
  The default category is \( \text{Partial/ No Response} \).
• **Cash Flow Forecast Dashboard** - available only when using SAP Business One mobile app 1.1.x for Android and higher on top of SAP Business One, version for SAP HANA, and on tablets only. This dashboard provides you detailed information about your company’s incoming and outgoing cash flows. For more information see the Using Cash Flow section in the SAP Business One, Version for SAP HANA User Guide.

• **User Defined Pervasive Dashboards** - available only when using SAP Business One mobile app 1.1.x for Android on top of SAP Business One 9.0, version for SAP HANA or higher. If you created pervasive dashboards by using the pervasive analysis designer, you can view them in the Dashboards module. These dashboards are listed after the predefined dashboards.

In addition, you can configure the refresh settings of the data cache for mobile dashboards.

**Viewing a Selected Dashboard**

1. On the **Modules** tab, tap **Dashboards**. The **Dashboards** page appears.
2. Tap the dashboard that you want to view. The respective dashboard page appears, containing the relevant charts.
3. To maximize a chart, double-tap the chart. To return to the dashboard home page, double-tap the maximized chart.
4. To return to the SAP Business One mobile app home page, tap **Close**.

   **Note**
   
   You can rotate the device into landscape to have a better view

**Configuring the Data Cache**

You use the same data cache functionality in both SAP Business One, and mobile dashboards. To enable the data cache and specify a schedule for refreshing data in dashboards, proceed as follows:

1. Choose **Administration → Setup → General → Dashboard Manager**.
2. In the Dashboard Manager window, choose the **Refresh Settings** button.
3. In the Data Refresh Settings window, enable the data cache by selecting the **Enable Data Cache** checkbox.
4. To establish a new time schedule, or to change an existing schedule for refreshing data in dashboards, select one or more checkboxes for the desired times (listed in the **Refresh Data At** column).
5. To save your changes, choose the **Update** button.

**Viewing Service Contracts and Searching for Equipment Cards in the Service Contract Module**

In the **Service Contract** module, you can:
• View details of service contracts and search for service contracts
• Search for and view customer equipment cards by entering an item’s serial number for a keyword search or

Viewing Service Contracts

1. On the Modules tab, tap Service Contracts.
   The Service Contract page appears. It displays a list of service contracts, sorted in descending order by the end date of the contract. By default, 20 service contracts with an end date furthest in the future are displayed. To view the next 20, scroll down the list to the bottom. To refresh the list, pull down at the top of the list.
   Note
   An end date in red indicates an expired contract.
2. To view the details of a contract, tap the contract.
3. In the Contract Detail page, you can do the following:
   o View information about the contract, such as service type and validity period. In addition, you can see cumulative response time and resolution time for service calls created for this contract and a list of the service calls for items covered by the contract.
   o Access the business partner by tapping either BP Name or BP Code.
4. To return to the list of service contracts, on the left of the toolbar, tap Service Contract.

Searching for and Viewing Customer Equipment Cards

A service contract may include one or more customer equipment cards. You can search for the equipment card of an item by using the item’s serial number or manufacturer’s serial number (if the item’s serial number is not available).
1. On the Modules tab, tap Service Contract.
   The Service Contract page appears.
2. From either the Service Contract page or the Contract Detail page, tap Search Serial Number. To search by serial number, tap Search Serial Number, enter a serial number, and tap OK.
3. If a customer equipment card is found, the Customer Equipment Card page appears, displaying information about the equipment, such as status and start and end dates.
   To view the service contract for this equipment item, tap Service Contract at the bottom of the Contract Detail page. To view service calls created for this customer equipment card, tap Service Call.

Viewing and Processing Service Calls in the Service Calls Module

In the Service Call module, you can:
• View service calls and service call details, including activities and solutions created for the service call
• Pick up service calls
• Close service calls
• Create new activities and solutions for service calls

Viewing Service Call Details

1. In the Modules tab, tap Service Call.

   The Service Call page appears. It displays a list of service calls, sorted in descending order by date. By default, the most recent 20 service calls with status Open are displayed. To view all of the existing service calls, tap All; To view only service calls with status Pending, tap Pending. To view only service calls assigned to you, tap My. For service calls with status Open or Pending the creation date is considered; for closed service calls, the Closed On date is considered. To view the next 20, scroll down the list to the bottom. To refresh the list, pull down at the top of the list.

2. To view the details of a service call, tap the call.

   In the Service Call Info page, you can view the following:
   o Business partner details
   o Relevant customer equipment card
   o Details about the item for which the call was created
   o Call status and priority,
   o Activities created and assigned to the service call
     1. To view the activities created for the service call, tap Activities.
     2. On the Activities List page, tap an activity to view its details.
   o Solutions created and assigned to the service call
     1. To view solutions created and assigned to the service call, tap Solutions.
     2. On the Solution page, tap a solution to review its details.

3. To return to the list of service calls, tab Back.
Picking Up Service Calls

You can pick up service calls with status Open. The status of the service call is then updated to Pending and the Handled By field is filled with the name of the current user. In addition, you can pick up service calls with status Pending that are handled by users other than the current user. In that case, the Handled By field is updated accordingly.

1. In the Modules tab, tap Service Call.
2. The Service Call page appears with a list of service calls. For information about the list, see step 1 in Viewing Service Call Details. Service calls with status Open have a blue side bar in the front of the service call.
3. Tap the service call you want to pick up.
4. On the Service Call Info page, tap then tap Pick Up.
   A warning message appears asking you to confirm picking up the call.
5. To continue, tap OK.
   You can now process the service call: add new activities or solutions and close the service call.

Closing Service Calls

1. In the Modules tab, tap Service Call.
   The Service Call page appears with a list of service calls. For information about the list, see step 1 in Viewing Service Call Details. Service calls with status Open have a blue side bar in the front of the service call.
2. Tap the service call you want to close.
3. On the Service Call Info page, tap and then tap Close Service Call.
   A warning message appears asking you to confirm closing the call.
4. To close the call, tap OK.
   The status of the call is updated to Closed and the Closed On field is filled with the date on which you closed the call.

Adding New Activities and Solutions to Service Calls

You can add new activities and new solutions only to service calls with status Open or Pending.

1. Display the relevant service call.
   a. To add an activity:
      1. Tap Activities.
      2. On the Activities List page, tap .
      3. On the Add Activity page, specify the activity details and tap Save.

   Note
   If you create a Meeting activity, Address field is added enabling to enter the meeting location.
   a. To add a solution:
1. Tap **Solutions**.
2. On the **Solutions List** page, tap +.
3. On the **Add Solution** page, fill in the solution details and then tap **Save**.

To return to **Service Call** page, tap **Back**.

## Managing Attachments

You can view, download, and upload attachments from and to business partners, items, activities, sales opportunities, sales documents, and service calls.

The Attachments entry is added as follows:

- To the **General** tab in the **BP Info** and **Item Info** pages
- To the **Activity Details** in **Activity**
- To the **Opportunity Info** in **Sales Opportunity**
- To the **Header** tab in sales documents
- To the **Service Call Info** in **Service Call**

## Viewing Attachments

1. Open the relevant document or object and navigate to the **Attachments** entry. Tap **Attachments**.
2. The **Attachments** page appears, listing the attached files. Touch and hold the attachment file you want to view.
3. Files of image types are displayed directly. For other file types, a system message asking which program to use for opening the file appears.
4. Select the required program. The selected attachment file is displayed.

## Uploading Attachments

You can upload attachments of image file types only, by either browsing to the required image file, or by taking a picture using your mobile device.

Uploading attachment is only possible to documents and objects that can be updated.

1. Open the document or object to which you want to add an attachment. Tap **Attachments**.
2. The Attachments page appears. To choose an existing image file, tap **Choose Photo** and browse to the image file you want to attach. To take a picture and attach it, tap **Take Photo**.
Generating Reports in the Reports Module

To generate reports, follow the steps below:

1. In the Modules tab, tap Reports.
   The list of available reports appears.
2. Tap the report that you want to generate.
3. If the report requires entering selection criteria, the Selection Criteria page appears. Tap a parameter to specify the required value. Then tap OK to return to the Selection Criteria page. Repeat this step until all selection criteria parameters are specified.
4. The chart and detailed information in the report appear. You can zoom in and out by either pinching or double-tapping. To change the orientation between portrait and landscape, rotate your device.
5. To return to the list of reports, tap Reports.
Appendix

More Information

Further information can be found in the following two SAP Notes:

- 1618978 - Blic_Troubleshooting Guide for Blic Installation
- 1924930 - SAP Business One mobile app for Android - Troubleshooting and compatibility information

Your Feedback Matters

You can provide SAP feedback about the quality, usability, functionality, or any other matter. Your input may help SAP to improve the mobile app.

6. Tap the menu button → Feedback and enter your feedback in the form
7. Tap Send.

Function-Level Authorizations for Users to Work with the App

The Modules tab of the mobile app displays the twelve modules provided by SAP, as well as user defined modules if exist. For SAP-provided modules, the mobile app retrieves authorization settings as defined in SAP Business One desktop application, controlling accessing, viewing, adding, and editing data.

The Alert and Approval modules do not require function-level authorization and are accessible by all users that are enabled to work on a mobile device.

In SAP Business One, a super user can assign permissions to a user by choosing Administration → System Initialization → Authorizations → General Authorizations.

The following table shows the functions that users can perform, and what authorizations are needed.

<table>
<thead>
<tr>
<th>Action</th>
<th>Minimum Required Authorization</th>
<th>Permission Setup in SAP Business One</th>
</tr>
</thead>
<tbody>
<tr>
<td>View SAP Crystal Reports</td>
<td>Full Authorization</td>
<td>A user needs authorization in SAP Business One to view each report. If a user does not have authorization to view a report in SAP Business One, the user cannot view the report using the mobile app.</td>
</tr>

<td>Full Authorization</td>
<td>Dashboard section in Authorizations window</td>
</tr>
<tr>
<td>View service contract</td>
<td>Read Only</td>
<td>Service Contract section in Authorizations window</td>
</tr>
</tbody>
</table>

<sup>1</sup>The price lists that belong to the price list group for which the user has either full authorization or read-only authorization are displayed in the mobile app.
<table>
<thead>
<tr>
<th>Action</th>
<th>Minimum Required Authorization</th>
<th>Permission Setup in SAP Business One</th>
</tr>
</thead>
<tbody>
<tr>
<td>View customer equipment card</td>
<td>Read Only</td>
<td>Customer Equipment Card section in Authorizations window</td>
</tr>
<tr>
<td>View service calls</td>
<td>Read Only</td>
<td>Service Section in Authorizations window</td>
</tr>
<tr>
<td>Process service calls</td>
<td>Full Authorization</td>
<td>Change Status in Special Service Call Authorizations section in Authorizations window</td>
</tr>
</tbody>
</table>

The permission related to a price list has nothing to do with the permission related to price list groups. If a user has no authorization for a price list, SAP Business One does not display any price list. If a user has no authorization to a specific price list group, SAP Business One does not display any price lists that belong to this group.

**Mobile App Function Availability Based on SAP Business One License Type**

The functions available for each user on the mobile app are derived from the type of license assigned to the user and from the authorizations granted to the users in SAP Business One desktop application.

Users who are granted with full authorizations within the license type assigned to them can use all the mobile app functions described in this document with the following exceptions:

- B1 Starter Package License – cannot access Service Call and Service Contract Modules.
- CRM Services License – cannot add new Sales Orders.

**Country Specific Information**

- Brazil - In companies who activated the multi-branch functionality the Branch field appears when viewing business partners and in sales orders and sales quotations.
- Chile - the RUT field is available in the business partner record
- Costa Rica, Guatemala, and Mexico - the RFC field is available in the business partner record
- India - the P.A.N. No. field is available in the business partner record
- Korea - the field Business Place is available in sales orders
